### About Undivided

Undivided is a support system for families raising kids with disabilities. While there are various programs, providers, and benefits available to families, they can be difficult to coordinate and put into place. We provide the glue that binds these programs and benefits together. We do this by layering in our unique software (both mobile and web) that allows you to digitize, organize, and share your paperwork, and through curated content and weekly live events with experts on the topics that matter most to our families. We also offer 1:1 support from Undivided parent Navigators. It's our mission to help every family feel supported, heard, and empowered.
